

InfernoGames.com

InfernoGames.com is a community of small gamers and viewers alike to upload, stream, and watch videos without restrictions in relation to monetization or fear of silencing in order to promote freedom of content creation.

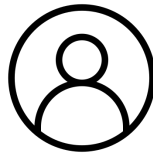

Inferno Games is a platform on which creators can easily and simply upload video content and/or stream content to a genre-specific group of viewers. Creators are given the freedom to choose whether their viewers must have a subscription to view their content or if the viewers can view it for free. Creators are also given the ability to find and utilize their own sponsors at will. For this reason, it is much easier for each creator to work independently and choose their own form of revenue, if any, removing many restrictions from said creators when it comes to monetization, or the lack thereof, that comes from many other sites such as YouTube. This service is the ultimate freedom from corporate silencing and corporations running the monetization of small creators.

Personas

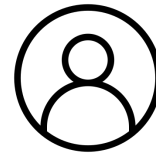

Video Game Content Creator

Video game players who are looking for a restriction-free ste to build a community on.
